Hi Dan,

We used **SolarX** and while you sent us a container of patch, we only used about 5%. After pressure washing there was only one little spot that could have caused concern so we patched it.

My landlord was impressed with the appearance and the ease with which this was accomplished. He was also duly impressed with the temperature decrease in the warehouse, about 15 degrees. Yesterday, he came over and picked up a copy of the research papers I had and will most likely be ordering enough **SolarX** to do the balance of the complex, as we only did our unit. He is also considering using **SolarX** to paint the outside of the building. All of us, landlord and tenants alike, have had enormous A/C bills. Our A/C units now cycle throughout the day, where they used to just run continuously and still lose the battle to rising interior temps. **SolarX works great!!**

Thanks,

Tom Rhodes—Cortez Pump & Sprinkler Supply, LLC.

**Bright White SolarX
Lowers Roof Temperature
& Cuts AC Costs!**

Interior Temperature
Lowered 15°

**Before SolarX,
roof temperatures
were 50° higher!**

**A/C savings can quickly pay
for installing SolarX!**

SolarX reflects radiant heat, blocks UV, lowers roof top temperatures, helps prevent thermal shock, dramatically lowers AC costs and improves worker comfort.
